PROFILE

Experienced SDET professional in IT, specializing in **banking, insurance, mortgage, airlines, ed-tech, and e-commerce.** I am proficient in exploratory and automation testing, using tools and technologies such as **Java, Selenium, Postman, Swagger, Jira, Confluence, Jenkins, copilot, Claude, windsurf,** and **Bitbucket**. I have good experience in testing **web, mobile, and API** based applications, as well as validating backend data using **SQL, MongoDB**, and **Couchbase**. I also have exposure to **AWS, Azure,Git** and **Linux**. I follow the agile-scrum methodology and collaborate with cross-functional teams to ensure high-quality deliverables.

WORK HISTORY

Automation Lead.

Mphasis pvt ltd. **May 2024 - Present**

Project- **Blackrock** (Investment bank, Aladdin, Portfolio management)
Team location- NewYork, Gurugram

- **Owned and maintained** the Portfolio Management Regression repository (Java), ensuring effective version control, repository governance, and code quality through structured pull request reviews and approvals.
- **Developed and executed manual and automated regression tests** to validate application functionality and maintain system stability **across multiple releases.**
- Configured and **managed test environments using Linux,** supporting system setup, troubleshooting, and test preparation for reliable execution.
- Managed and optimized Azure CI/CD pipelines, automating build, test, and deployment workflows to enable efficient and consistent releases.
- Validated microservices architecture and performed backend data verification using Aqua Data Studio with Sybase and MS SQL, ensuring service integration and data integrity.
- **Collaborated with cross-functional stakeholders** and participated in bug triage, prioritizing and resolving defects while leveraging AI-assisted tools such as **Copilot, Claude, and GPT** within IntelliJ IDEA to improve productivity.
- Implemented **parallel test execution using JUnit 5,** significantly reducing regression execution time and improving pipeline efficiency.

Middle QA Engineer

Unlimit R&D India Private Limited ("Unlimit") **Aug 2023 - May 2024**
Team location: St. petersberg, Gurugram

- Developed and maintained automation test scripts using **Selenium, Java, and Cucumber,** improving regression test coverage and reliability.
- Configured and managed test environments, troubleshooting cross-application issues to ensure smooth testing workflows.
- Utilized **Jenkins for CI/CD** pipelines, automating build deployments and executing automated test suites.
- Executed SQL queries and validated data in **MongoDB**, ensuring backend data integrity and accurate application behavior.
- Created and managed detailed **JIRA** tickets, supporting **defect tracking**, requirement clarity, and efficient project management.
- Led daily **scrum** meetings and performed defect tracking and retesting, ensuring timely resolution and high software quality.

Noida U.P

EXPERTISE

- **Problem solver** with hands on experience on **API automation framework** using **Rest assured** and UI framework using **java** and **selenium**.
- Proficient in test case preparation and execution, ensuring thorough coverage and accuracy.
- Experienced in conducting various types of testing including **sanity, smoke, regression, functional,** and **end-to-end testing.**
- Proficient in database testing, utilising **MS-SQL Server** to run queries and verify data integrity.
- Knowledgeable in **bug tracking** and reporting using **Jira**, ensuring efficient **defect management** and resolution.
- **Go and get that done attitude.**

Pat on back - Moolya

Outstanding performer - BCS

WORK EXPERIENCE

QA Lead

Moolya software testing pvt ltd **Mar 2020 - Aug 2023**

Project - Rupeek

Team location: Banglore

- **Led a team of 10 QA engineers,** guiding them towards project goals with clarity and support.
- Conducted daily **scrum** calls to keep everyone in sync and track progress effectively.
- Developed test plans and strategies to ensure thorough testing of our products.
- Presented **demos** to key **stakeholders**, explaining product features and gathering feedback.
- Execute SQL queries and extract data from **MongoDB** for verification
- Carried out regression, sanity, and exploratory testing to maintain product quality.
- Managed build deployments using **Jenkins**, making the process seamless and reliable.
- Maintained and improved automation test scripts to streamline testing efforts.
- Ensured test environments were up and running for efficient testing activities.

Project - Jupiter

- Prepared test cases meticulously and executed them with precision.
- Conducted sanity tests before each release to ensure product stability.
- Created **JIRA** tickets for identified issues and performed thorough re-testing.
- Participated in regular scrum calls to stay aligned with team goals and progress.
- Contributed to release planning activities, ensuring smooth and timely product deliveries.
- Actively participated in Agile ceremonies to foster collaboration and streamline project workflows.
- Conducted comprehensive testing of **Android and iOS** applications to validate functionality according to the business rules.
- Analyzed and reported test results to **stakeholders**, providing valuable insights for decision-making and product improvement.
- Participated in continuous improvement initiatives to enhance testing processes and methodologies.
- Acted as a mentor to junior team members, providing guidance and support to foster their professional growth.

Software Test engineer

Fintech infosystems (Start-up) **Aug 2018 - Mar 2020**

Team location: Banglore

- Responsible for setting up and **configuring test environments** to ensure optimal conditions for software testing activities.
- Active participation in **Scrum** calls to provide updates, discuss progress, and align efforts with team objectives.
- Utilizing **Jenkins** for seamless and efficient deployment of software builds, ensuring smooth transitions across environments.
- Maintaining and enhancing API automation suites using **Java and Rest Assured** framework to ensure reliable and scalable testing solutions.
- Creation and maintenance of UI automation suites using **Selenium WebDriver**, ensuring comprehensive test coverage and efficient test execution.
- Engaging stakeholders to deeply understand customer pain points, enabling informed decision-making and product improvements.
- Active involvement in **retrospective** meetings to reflect on past iterations, identify areas for improvement, and drive continuous process enhancements.
- Execute **SQL** queries and extract data from **MongoDB** for verification
- Managing **EC2** instances to ensure availability and performance of testing environments, optimizing resource utilization and scalability.

Awards

Flying star - BCS technology

WORK EXPERIENCE

- Developing automation scripts using **Java**, **Selenium WebDriver**, and **Cucumber** framework to automate repetitive tasks and streamline testing processes.
- Conducting testing activities for web applications and **Android** apps to validate functionality, usability, and performance across different platforms.
- Monitoring application logs using **Grafana, AWS console**, or terminal logs to identify and troubleshoot issues in QA, staging, and production environments.
- Performing thorough testing of **REST APIs** using **Postman** tool to ensure compliance with specifications and functional requirements.
- Implementing and optimizing deployment pipelines to enable streamlined and efficient deployments, enhancing team productivity and software delivery cadence.
- Providing knowledge transfer and assistance to new team members to facilitate smooth onboarding and integration into the team.

BCS technology (Australian service based MNC) **Mar 2016 - Aug 2018**
Team location: Manila, Gurugram

Associate QA

Project - Volaris Airways.

- Prepared and executed comprehensive test cases with meticulous attention to detail.
- Tracked and reported bugs effectively using **JIRA**, ensuring clear communication and resolution tracking.
- Conducted thorough testing of the **Volaris.com** website, ensuring optimal functionality and user experience.
- Actively participated in sprint planning and retrospective meetings, contributing insights and feedback to enhance team performance.
- Utilized Skyspeed to prepare **PNR test data**, ensuring accurate and efficient testing processes.
- Performed a wide range of testing activities including **re-testing, regression testing, sanity testing, integration testing**, and **smoke** testing to ensure the stability and reliability of software products.

Project - Jazzera Airways.

- **Prepared test cases** and executed them with precision, ensuring thorough coverage of all aspects.
- Maintained a detailed test coverage sheet to track testing progress and ensure comprehensive coverage across various scenarios.
- Conducted **sanity, smoke, and retesting** to validate the stability and reliability of software releases.
- Conducted extensive testing of the Jazeera Airways website (**jazeeraairways.com**), ensuring seamless functionality and user experience across different platforms and devices.
- Utilized **MS-SQL Server** to run database queries, verifying data accuracy and ensuring smooth integration with the application.
- Performed a variety of testing activities including **Sanity** Testing, **Regression** Testing, **Functional** Testing, and **End-To-End** Testing, to ensure the quality and performance of software products.
- Conducted **Hot-Patch Testing** for Requirement **Change Requests** (CRs), ensuring smooth implementation of new changes without disrupting existing functionality.
- Tracked and reported bugs efficiently using Jira, facilitating clear communication and resolution tracking throughout the testing process

WORK EXPERIENCE

Project - Jetstar Airways (Dot net developer)

- Developed and maintained .**NET applications**, leveraging **C# and .NET** Framework to deliver robust and scalable solutions.
- Contributed to the design and implementation of .NET-based features and functionalities, ensuring adherence to coding standards and best practices.
- Collaborated closely with software developers to integrate QA processes seamlessly into the .NET development lifecycle.
- Created detailed **JIRA** tickets to track and prioritize identified issues, facilitating effective bug resolution.
- Leveraged the **Skyspeed** tool proficiently to generate PNRs for testing, ensuring accurate and efficient testing activities.
- Collaborated seamlessly with teams across different time zones, fostering effective communication and alignment to achieve project objectives.
